

Jeger Oxyd is a decorative wall decorative effect imitating rust.

You can do it yourself in one day!

It's just 3 steps

Only 2 tools:

1 Apply Jeger Oxyd Primer

Apply **Jeger Oxyd Primer** on a clean, dry, dust-free and degreased surface. Leave it to dry for 4 hours.

2 Apply Jeger Oxyd and Jeger Oxyd Activator

+ Oxyd 3D optionally

Apply a thin layer of **Jeger Oxyd** and leave it to dry for about 8 hours. (If you want to obtain the solid corrosion effect, apply **Jeger Oxyd 3D** with a sponge and then smooth it gently using a plastering trowel). Afterwards, apply **Jeger Oxyd Activator** with provided atomizer. The rust effect will appear in 2-8 hours. You can repeat the rust activation process several times until you achieve the desired effect.

3 Apply Jeger Oxyd Protector

Apply **Jeger Oxyd Protector** after 24 hours. The varnish stops the activation process and protects the decorated surface.

±6 coverage per container (1L) m<sup>2</sup>

jeger.com

The efficiency of the product and the number of paint layers depend on the structure and absorbency of the painted surface, its thickness, application methods and the contractor's experience.
