

Jeger Sahara is a decorative structural paint with a delicate metallic shimmer and sand particles.

You can do it yourself in one day!

It's just 2 steps

Only 2 tools

1 Apply Jeger Color Paint

Apply **Jeger Color Paint**, using an appropriately selected colour, on a clean, dry, dust-free and degreased surface (e.g. Ottavio + Color Paint P0001, table below). Leave it to dry for 2-4 hours.

2 Apply Jeger Sahara

Mix **Jeger Sahara** thoroughly. Do not dilute. Do not mix with other products. Apply on a wall using a paint brush dedicated to decorative effects. Apply the product on a small surface (2 x 2-3 meters), spreading it crosswise in different directions. Do not rub too hard. If necessary, fill the unpainted gaps. Leave it to dry for 4 hours.

Remember: : If you need to use more than one container of the product, mix the contents of all containers together before applying. This ensures a uniform shade. Before proceeding with the entire application, test the product on a small surface.

Match an appropriately selected Color Paint product to achieve the desired Sahara effect

Nicola	+	Exwhite	Matteo	+	P0181	Mario	+	P0152	Norberto	+	P0524	Cristiano	+	P0009
Ottavio	+	P0001	Sergio	+	P0278	Maurizio	+	P0538	Raffaello	+	P0513	Angelo	+	S2005

±8 product efficiency (1 L) m²

The efficiency of the product and the number of paint layers depend on the structure and absorptency of the painted surface, its thickness, application methods and the contractor's experience.
