

Jeger Industrial is a ready-to-use decorative coating, which allows you to obtain a delicate metallized surface.

You can do it yourself in one day!

It's just 2 steps

Only 2 tools

a paint roller

a venetian trowel

1 Apply Jeger Color Paint

Paint a clean, dry, dust-free wall with **Jeger Color Paint** for decorative effects in the appropriately selected color (e.g. Platinum + Color Paint P0525). Wait 2-4 h for the paint to dry.

2 Apply Jeger Industrial

Mix **Jeger Industrial** thoroughly. Do not dilute, the product is ready to use. Apply the first thin layer with a Venetian trowel. Apply the effect in small sections, spreading it in different directions. After approx. 1-2 minutes, smooth gently with a trowel (for greater smoothness, gently moisten the trowel with water). After covering the entire surface, wait for about 2 h and then apply a second layer in the same way.

**Remember:** If it is necessary to use more than one package of the product, mix the contents of the packages before applying. This will create a uniform shade. Test the effect on a small area before applying it to the whole surface. The product is intended for interiors.

Match an appropriately selected Color Paint product to achieve the desired decorative effect

Calcium	+	P0538	Calcyt	+	P0538	Zinc	+	P1315	Magnezium	+	P0548	Bazalt	+	P0513
Quartz	+	P0538	Platinum	+	P0525	Chrom	+	P0532	Carbon	+	P0548	Gold	+	P0009

±7 product efficiency (1 litre) m<sup>2</sup>

The efficiency of the product and the number of paint layers depend on the structure and absorptency of the painted surface, its thickness, application methods and the contractor's experience.
